

“Days Like This”

What do you see
Lying on our backs as the clouds turn into faces
Sun’s blinding but I don’t mind it

Watch all the people strolling by
So different but they all want to have a good time
It’s the perfect day to unwind

Sitting on the grass with my best friends or whoever comes along
Living in the moment
And loving every minute
This can’t get much better

I love days like this
I love days like this

Hide with me
We’ll escape behind the shade of our favorite tree
Close your eyes and feel the breeze

Where no one cares who you are
I hear a song, a drum, someone brought a guitar
So close but they seem so far

Sitting on the grass with my best friends or whoever comes along
Living in the moment
And loving every minute
This can’t get much better

I love days like this
I love days like this

You could stay
Everything’s within the reach of our blanket
If the sun slips away
Tomorrow we’ll be back

Sitting on the grass with my best friends or whoever comes along
Living in the moment
And loving every minute
This can’t get much better

I love days like this
I love days like this
