

### **“While I Sleep”**

Could you please demonstrate to future lovers  
How to syncopate my heartbeat  
How to anticipate my deepest needs  
And yours that match conveniently

I believed every word  
And imagined those I never heard  
I'll try to listen better but  
I only want to hear you say I'm the

The one thing  
The one thing  
That you need  
The one thing  
The one thing  
To make complete  
But every time you touch me it's only to leave  
You steal away while I sleep.

Maybe another day  
I'll piece together your reasons why  
Now I'll unravel my failed attempts  
Of my demand for your supply.

But I was never the aggressive kind  
You said you didn't even like that type  
I'll close my eyes before you go  
So I can hear you say

The one thing  
The one thing  
That you need  
The one thing  
The one thing  
To make complete  
But every time you touch me it's only to leave  
And every time I crave you you're never within reach

One thing  
The one thing  
That you need  
The one thing  
The one thing  
To make complete  
But every time you touch me it's only to leave  
And every time I crave you you're never within reach  
You steal away while I sleep
